GRAIN—WHEAT—The action of wheat prices to-day was again unsatisfactory from the buil standpoint. The origining was quick at about the closing fb.ures of Saturday night, but there was practiculty no demand, and who is few selling orders came in prices turned weak, reaking about 3c during the moraling hours, and were heavy at the decline. There was some talk carly about the correction to the Russian visible supply, but later Chicago advices asserted that there had been no correction in the fluxes. The local stocks showed about as anticipated, 13d private able see dull and heavy. There was some talk about the movement at the interior, and it was asserted that the arrivals of spring wheat would soon show increase, owing to the attractive prices at Minneapolis for cash what. The total arrivals, nowever, were only 500 cars at the two points in the Northwest, which was 800 cars short of the arrivals on the corresponding day last year. The visible supply showed a larger increase than expected, the gain amounting to 1.34; 000 thush past year and 43 262 000 bush, against 78.821,000 thush last year and 43 262 000 bush two years pio. Toward the close there was quite a little selling novement diveloped, and on them of derings of stuff for local account the market closed weak at the lewest prices of the day, a not decline of 5 wiles compared with the main prices of Saturday. There seemed to be a feeling of discouragement in the market lake and there was very little demind excepting a smell quantity to cover shorts.
